Agreement on registration of authorized user(s) for access to digital documents in the patent application in My pages - Patents SE

Information about authorized users for a patent application

To gain access to your digital patent application in My pages - Patents SE you need to register one or more authorized users. An authorized user can log in to My pages - Patents SE and see digital documents in a specific patent application and they can set up to receive digital notifications about new events. In a later version of the e-service, an authorized user will be able to opt out of receiving correspondence through paper document letters.

Information about the service

Registering authorized users in My pages - Patents SE means that you agree that this patent application is made available for those users who have been granted authorization.

Terms of Service

You are responsible for both selecting and giving authorized user access to the patent application and for the removal of those authorized users who no longer should have access to the patent application. To be able to use an account with the e-service, persons designated as authorized users (private persons) must log in with a Swedish e-ID or EPO Smartcard. If authorized users change their name or personal identity number, it is mandatory to contact PRV. If the terms of My pages - Patents SE change, the authorized users who have access to the patent application must accept these. Please note that, if the terms of change are not accepted, an authorized user will not be able to access the patent application. Registration agreements of authorized user(s) for patent applications in My pages - Patents SE will be electronically stored at PRV.

Scope and content

My pages - Patents SE provides digital information about your or your company's national patent applications, this includes case-related letters and documents contained in the file. The e-service is only to be used as a source of information about your cases. PRV will continue to send all correspondence via paper/post, responses to orders or other letters to PRV must still be answered in the usual way, e.g., via PRV's electronic submission services.

If the information differs between the e-service and paper mail, it is the paper correspondence that applies. If PRV has not sent a notification via the e-service but has only sent a letter via regular mail, it is that letter that applies.

Swedish e-identification and use of personal data

With the support of laws and regulations, PRV has the right to process a certain amount of personal data. To enable users to log in and use the service, PRV needs to process personal data in the form of a personal identity number. The personal data is processed in the systems that manage the e-service; the purpose of the processing is to satisfy the need for secure identification.

1. Applicant's/representative's reference number

State your reference number.

2. Applicant

State your name or the company's name, address and phone number. If there are multiple applicants, you must state everyone's name and address. Please use the appendix "Additional applicants". Companies should state their registration number, and individuals may state their personal identity number / social security number.

Unless the applicant is also the inventor, you must make a statement on how you acquired the right to the invention, for example via purchase, inheritance or as a gift.

The right to the invention can also be acquired by applying a collective agreement or the Act on the Right to Employee's Inventions, No 349 of 1949.

3. Inventor

State the name of the inventor. If there are multiple inventors, please tick the box intended for this and use the appendix "Additional inventors".

4. Representative

If you have appointed an agent to represent you before the PRV, state the representative's name, address and phone number here. Also, tick the appropriate box regarding what kind of power of attorney you have granted.

5. Title of the invention

State the title of the invention. The title must be short and based on facts, for example "toothpaste dispenser" or "fire-extinguisher".

6. Application has been previously faxed

If you fax your patent application, it is considered to be filed on the day the fax reached PRV. However, you must also file the application with your signature in original writing. When you do so, state the date you faxed the application.

7. Choice of language

Choose if you intend the language of the granted patent to be Swedish or English. If you choose English, you should also choose in which language you wish to receive PRV's office actions and decisions. All documents forming part of your application must be in the same language. If the patent shall be granted in English, you are required to translate the patent claims into Swedish and submit them no later than when you pay the grant fee. The scope of the patent is, however, always decided from the wording in the language of grant.

If you have chosen the patent to be granted in English, and wish to obtain a provisional protection before grant, you must submit a Swedish translation of the patent claims before the application is published. If you fail to submit a Swedish translation of the patent claims before the application is made available to the public, you may obtain provisional protection at a later time – subject to a fee – by submitting such translation for publication.

8. International application entering national phase

If your patent application regards the national stage of a PCT application, state the international filing date and international application number here.

9. Request for priority

If you want to claim priority from an earlier patent application regarding the same invention, filed in Sweden or in another country party to the Paris convention or to the WTO, you should state the application number and filing date of the priority application as well as the Patent Office where it was filed.

Priority means that your new patent application is considered to be filed on the same day as your earlier application when the Patent Office examines the novelty of your invention. The request for priority must be made within sixteen months from the filing date of the priority application, or, if that point in time is later, within four months from your new application's filing date. Priority can be important if someone files a corresponding patent application before you do.

The priority document must be submitted within 16 months from the priority date.

If you previously have used the **Digital Access Service** (DAS, cf. under item 13) and another Patent Office has uploaded your priority document to the DAS, you may submit the access code given by the International Bureau of WIPO here. PRV will then use the access code to electronically retrieve the priority document you claim in your application, and you don't have to send the priority document to us.

If you previously have filed the priority document and certificate with PRV, you don't have to file these again. However, you must state in which patent application the document and certificate were filed, so that PRV can retrieve the documents from that application.

10. Divisional application

A single patent application can only contain one invention. If you have described more than one invention in an application, and been encouraged to divide the application, you must indicate the original application number here.

A divisional application will always obtain the same filing day as the original application.

11. Deposit of biological materials

If your invention contains or regards a living culture of microorganisms, you must state the depositary authority, the date of deposit and the accession number.

12. Fees

Application fees

Filing fee and search fee are compulsory fees which you must pay before PRV examines your application. Therefore, these boxes are already ticked on the form. If your application contains more than ten patent claims, you must pay an additional fee for each claim exceeding ten.

Additional fees

An International Type Search (ITS) gives you a wider and deeper search result. The ITS report gives you a good basis for assessing the possibilities of applying for a patent in other countries. The ITS is subject to a fee.

If your application is a pursued international application and you want an additional two-month time limit to file the Swedish or English translation of the application, you must pay an additional fee.

13. Method of payment

Pay using our e-service "Electronic payment" at www.prv.se after your application has been registered. You can also make payments using our Bank Giro account or your deposit account.

Unfortunately, we can't send you an invoice.

When making payments, please state the application or publication number if you know it. If not, state the title of the invention, your name and what your payment regards.

Please note that we will not examine an application before payment of the application fee has been registered.

14. Additional services

Digital Access Service is a voluntary service established and administered by the International Bureau of WIPO. It enables a patent applicant claiming priority from an earlier application to rely on a copy of the priority document held in, or accessible via, the service, rather than having to provide a certified copy separately to each patent office with which a patent application claiming priority is filed.

PRV will create a priority document and electronically transfer it to WIPO via a secure data exchange. The document will be held by WIPO in a secure database. WIPO will acknowledge receipt of the document by supplying a unique access code. This allows you to authorize, via a web portal, participating patent offices to have access to the priority document(s) deposited. The access code will be sent to only one e-mail address, namely the one you specify here. PRV will forward this e-mail address to WIPO.

15. Signature

Sign and date the application and any legal documents enclosed with the application, such as power of attorney or deed of transfer. If there are multiple patent applicants, you must all sign the application and the power of attorney. If a company is the applicant, the application must be signed by a person authorized to sign for the company.

16. Appendices

Description, patent claims and abstract are compulsory appendices. These boxes are therefore already ticked on the application form. If you need to enclose any other appendices, please tick the appropriate box.

The appendices may be filed in another language than Swedish or English. However, you must translate these documents, as filed, into Swedish or English before the examination procedure starts.

Additional applicant(s) (see item 1)

Additional inventor(s) (see item 2)

The description shall be in two parts:

1. A general part where you describe the problem your invention is the solution to. You should also specify the state of the art, i.e. already known solutions to the problem.
2. A specific part where you describe the invention in detail, using specific examples on how to carry out the invention. The description must be clear – a person skilled in the art should be able to understand and carry out the invention by reading the description.

Please note that all necessary information must be enclosed in the description on the filing date, since you are not allowed to add material at a later time.

The patent claims determine the scope of patent protection. It is therefore important that you are careful and precise when you write your patent claims. You may have one or more independent claims with different dependent claims. Every independent claim shall include the title of the invention, the state of the art (i.e. what your invention has in common with previously known technique) and what is new and characterizing with your invention.

The abstract shall be short, no more than 150 words, and summarize the technical content of the application in order for the interested person to quickly get an idea of its content.

Drawings may be necessary to explain the invention. The explanation to the drawings must be included in the specific part of the description. The drawings shall be submitted on separate, white, A4-size paper, drawn in black, and may not contain any explanatory text.

Power of attorney must be enclosed if you want to be represented by someone else before the PRV. A power of attorney must always be submitted in original and specify the application/s or patent/s in which the representative is empowered.

Sequence listings in electronic format which meet WIPO Standard ST.26. Inventions regarding biotechnology must contain listings of amino acid or DNA sequences to precisely define the scope of the invention – i.e. the patent.

Priority document and certificate (see item 8).

Authorized User(s) for access to My pages - Patents SE and digital documents

Do you wish to contact the PRV?

Do you have any questions? Call or send an e-mail to the PRV's Customer Service.

Phone: +46 8 782 28 00, e-mail: kundsupport@prv.se.
For more information, please visit our website, www.prv.se.

Customer Service is open Monday-Friday 08.00-16.40 (08.00-16.00 during May 15 – September 14).

Some restrictions may apply on day before holiday.

Send your application to PRV, P.O. Box 5055, SE-102 42 Stockholm, Sweden.
