57	Photography, cinematography and sound motion pictures
57a	Photographic cameras and accessories, shutters, motion picture apparatus, automatic cameras, sound motion picture apparatus
57b	Photographic processes, blueprints, photosensitive plates and papers, colour photography, X-ray photography and photosculpture
57b	(IPC: G03C) Photosensitive compositions or bases carrying them; Photographic processes, e.g. cine, x-ray, colour, stereo- photographic processes; Auxiliary processes in photography
57c	Devices and machines, dark rooms
57d	Photomechanical reproduction
57e	(IPC: G03G) Electrography; Electrophotography; Magnetography
57a	Photographic cameras and accessories, shutters, motion picture apparatus, automatic cameras, sound motion picture apparatus (lenses and optical accessories 42h)
	Cameras with baseboard, cover or the like; studio cameras
57a-1/01	Lens boards, lens carriers and devices for setting, inclining and transverse shifting
57a-1/02	Baseboards
57a-1/03	Rear part of cameras (focusing screens 57a-10/01)
57a-1/04	Camera bellows
57a-1/05 57a-1/06	Mechanical devices for adjusting the emulsion support to the picture plane Optical devices for adjusting the picture plane
57a-1/07	Cameras with automatic adjustment of lens board on opening of camera, spring cameras
57a-1/08	Materials and processes for manufacturing camera components
57a-1/09	Scales
57a-1/10	Miscellaneous
57a-2/01	Box cameras
57a-2/02	Flat cameras
57a-3	Folding cameras
	Cameras with devices for obtaining stereoscopic effects (picture measuring devices 42c-9)
57a-4/01	Double cameras for stereo pictures (viewing apparatus 42h-22; double cameras for view finding purposes 57a-9/04; for colour photography 57a-8/01)
57a-4/02	Cameras with one lens and mirror attachments
57a-4/03	Cameras with two lenses and mirror attachments
57a-4/05	Picture-taking devices for screen stereoscopy (57b-12/06)
57a-4/06	Cameras for photographic sculpture (57b-19)
57a-4/07	Processes and devices for copying stereoscopic pictures (chem. section 57b-18/04, 57b-18/06)
	Reproduction cameras in general
57a-5/01	Reproduction cameras

57a-5/02 Reproduction cameras with automatic focusing

57a-5/03	Cameras for making composite, so-called superposed patterns, by projection (by contact copying 57c-11/01, 57c-11/02)
57a-5/04	Processes and devices for copying motion picture films by projection (copying of coloured motion picture films by projection 57a-8/05)
57a-5/05	Illumination devices for reproduction cameras
57a-5/06	Tripods for reproduction cameras
57a-5/07	Magazines for reproduction cameras
57a-5/08	Holding devices for originals
57a-5/09	Reproduction cameras with devices for image-distortion correction (photogrammetric processes 42c-10/02)
57a-5/10	Devices for screen and diaphragm adjustment in reproduction cameras
57a-5/20	Processes and devices for electro-optical copying of single and motion pictures (production of copying models for photomechanical reproduction 57d-1, 57d-3, 57d-10; television 21a1-32 – 21a1-35)
	Panoramic cameras
57a-6/01	Panoramic cameras with fixed emulsion supports
57a-6/02	Panoramic cameras with movable emulsion supports
	Cameras of special shape and for special purposes
57a-7/01	Cameras of special shape, secret cameras
57a-7/02	Cameras with mirror attachments
57a-7/03	Cameras for photographing the outer eye (photocystoscopes and the like 30a-1/03;
	photography of the eye fundus 42h-32/07)
57a-7/04	Cameras for microphotography
57a-7/05	Pinhole cameras
57a-7/06	Cameras for producing distortions (anamorphic lenses 42h-6/03)
57a-7/07	Cameras for aerial photography, e. g. from airplanes, balloons, kites, rockets and missiles (measuring devices on same 42c-10/01; finders 57a-9/06; devices for changing emulsion supports 57a-13, 57a-25/01)
57a-7/10	Devices for X-ray photography, nonelectrical (21g-19/01, 21g-19/02; measuring of X-ray photographs 42c-10/04)
57a-7/11	Equipment for X-ray stereoscopic photography (circuit diagrams for making X-ray photographs 21g-19/01; viewing and projection 42h-22, 42h-23; X-ray cinematography 57a-56)
57a-7/12	Mechanical equipment for adjusting or limiting exposure during X-ray photography (electrical exposure meters and limiters 21g-19/03)
57a-7/13	Diaphragms for X-ray photography (other types of X-ray diaphragms 30a-6/06; filters for X-ray tubes 21g-20/15)
	Cameras for colour photography
57a-8/01	Cameras for colour photography in general
57a-8/02	Cameras with single lens and devices for beam splitting (optical systems for beam splitting 42h-6/01)
57a-8/03	Cameras with multiple lenses, also with devices for prevention of parallax (42h-6/01)
57a-8/04	Cameras for colour photography with aid of screens (colour screens and filter 57b-18/07)
57a-8/05	Processes and devices for copying colour films, especially screen films (chem. section 57b-18/04, 57b-18/06)
	Finders
57a-9/01	Finders in general, mechanical section (finder lens systems 42h-6/10)
57a-9/02	Finders combined with bubble level or pendulum
57a-9/03	Finders combined with photometers
57a-9/04	Focusing finders, double cameras for finding purposes

57a-9/05 Range finders combined with photographic apparatus, adjustable range finders (range finders in general 42c-14 – 42c-23)

57a-9/06	Finders for aerial cameras
57a-9/10	Reflex cameras, non-collapsible
57a-9/11	Reflex cameras, collapsible
57a-9/12	Devices for speedy movement of ground glass screen, view sighting cameras
57a-9/13	Mirrors for viewing the focusing screen
	Miscellaneous elements and accessories for photographic cameras
57a-10/01	Ground glass focusing screen arrangements (ground glass focusing mirrors 57a-9/13, 57a-22/10)
57a-10/02	Rear light screening flap, dark cloth
57a-10/03	Tripods for studio cameras and for special photographic purposes (tripods for general purposes, also for amateur photographic purposes 42c-1/01 – 42c-3/02; tripods for reproducing cameras 57a-5/06; for cinematographic apparatus 57a-59)
57a-10/04	Holders for filters, attachment lenses, light-screening devices on lenses
57a-10/05	Attachment of inclinometers and bubble levels on cameras (on finders 57a-9/02, levels in general 42c-24/01 – 42c-24/04; on aiming devices 42c- 6/01)
57a-10/06	Protective bags, carrying straps or the like
57a-10/07	Ventilation for cameras
57a-10/08	Devices for writing on the emulsion inside the camera
57a-10/09	Attachment to cameras and devices for limitation of field of vision (for roll film cameras 57a-22/01)
	Photographic magazines
57a-11/01	Magazines in general (film roll holders and film cases 57a-22/03)
57a-11/02	Magazines for film packs
57a-11/03	Holders for plates, films or the like
57a-11/04	Indicating devices
57a-11/05	Locking arrangements
57a-11/06	Holders for grids, filters, or the like, in photographic cameras; also devices for picture series
	Repeating devices
57a-12/01	Multiple cameras
57a-12/02	Multiple magazines
	Changing devices for plates and cut film
57a-13	Changing devices with attachable magazines
57a-14/01	Single and double holders for plates and cut film
57a-14/02	Changeable holders for plates and cut film without reversing bar (with turning strip 57a-21/02)
57a-15	Changing devices with multiple magazines
57a-16	Changing devices with special changing spare
57a-17	Changing devices with pull-out magazines
57a-18	Changing devices with tilting plates
57a-19	Changing devices with horizontal magazines and means for raising the plates into position
57a-20	Miscellaneous changing devices: movable plate stacks, around which the plates are guided, plates with staggered tabs
57a-21/01	Changing devices for cut film exclusively, except for those in 57a-22/07
57a-21/02	Changing holders with turning strip for cut film, film packs (film pack magazines 57a-11/02)
57a-22/01	Roll film cameras, general arrangements
57a-22/03	Roll film magazines, film cases (magazines for motion picture cameras 57a-47)
57a-22/05 57a-22/07	Film feeding devices with or without spring mechanism, also for aerial cameras Roll film cameras with cutting devices

57a-22/08	Marking and counting devices for roll film cameras
57a-22/09	Devices for keeping the film flat in roll film cameras
57a-22/10	Roll film cameras with ground glass focusing screen adjustment
57a-23/01	Spools for roll film cameras (spools for motion picture cameras 57a-47)
57a-23/02	Spool holders for roll film cameras
57a-24	Roll film and plate cameras
57a-25/01	Cameras with coupled drive for changing devices and shutters, series picture devices
57a-25/02	Signalling and locking devices for roll film cameras, to prevent double exposure and exposure omission
	Photographic lens shutters
57a-26	Simple sliding or rotary shutters
57a-27	Simple roller blind shutters, curtain structures and aperture shapes, rollers and the like
57a-28	Roller blind shutters with adjustable aperture width
57a-29	Double sliding shutters; opposed, tandem, telescopic
57a-30	Sector shutters, diaphragms for photographic cameras
57a-31	Miscellaneous shutters
57a-32/01	Operating mechanism for shutters
57a-32/02	Retarding mechanisms for shutters
57a-32/03	Release of shutters: wire release, automatic release, flash bulb release, wire-pull release, electrical devices, etc., excluding those in 57a-32/04
57a-32/04	Shutters with delayed action mechanism
57a-32/05	Shutters with exposure tables, exposure meters and automatic exposure regulators
57a-32/06	Shutter cases, counters, safety devices and other details of lens shutters, excluding those in 57a-25/02
	Cinematography
57a-33	Devices for intermittent movement of films (Geneva movements as machine element 47h-4, 47h-5; double apparatus 57a-45)
	Devices for compensation for picture shifts in moving films
57a-34/01	with optical compensation (optical systems 42h-5)
57a-34/02	with mechanical compensation
57a-35	Cinematographs with pictures on plates or drums
57a-36	Cinematographs with book-leaf type pictures, mutoscopes (as observation instruments 42h-37)
	Stereoscopic cinematography (optical systems 42h-22)
57a-37/01	with three-dimensional parallax picture groups
57a-37/02	with other means for production of stereoscopic effects
57a-38	Colour motion pictures (colour photography 42h-23/13, 57a-8; films with lenticular screens (442h-6/04, 57b-18)
57a-39	Drives and drive parts for motion picture taking and reproduction apparatus, structures and housings
57a-40	Film gates and film loop formers
57a-41	Adjustment of film in film gate
57a-42	Film guides, intermittent feed rollers
57a-43	Arrangement of optical equipment, e. g. lenses, finders, focusing devices, exposure meters, iris diaphragms in cinematographic apparatus (optical systems 42h-1, 42h-5; lamps with mirrors or condensers 57a-58/01)
	Shutters
57a-44/01	Revolving shutters
57a-44/02	Other shutters, exposure interruption
57a-45	Devices to prevent flickering, double apparatus

57a-46/01 57a-46/02	Films (sound films 42h-23/05, 42h-23/06; 57a-64 – 57a-72; 57b-2) Film structure and size, edge reinforcements Guides and markings on film, devices for applying same perforation
57a-47/01 57a-47/02	Film holders for motion picture apparatus (film cabinets 57a-52/03) Magazines for unexposed films Drums and spools for finished films
57a-48 57a-49	Devices for rewinding and measuring films (cleaning 57c-13/04) Devices for preventing rewinding, external winding devices, extraction from inside, endless films (in advertising devices 54g-5, 54g-10)
57a-51	Devices for stopping films, also in target cinematographs (72e-2/04; with coin insertion 43b-41/04)
	Fire protection
57a-52/01	Devices for preventing burning of films
57a-52/02	Devices for extinguishing burning films
57a-52/03	Fireproof storing of films
57a-53	Devices and processes for combination, trick and quick motion photographing (slow motion devices 57a-61; photochemical section 57b-13/03; trick sound films 57a-71)
57a-54	Equipment for title and text photography or reproduction (copying 57c-11/03)
57a-55	Equipment for panoramic photography or reproduction (tripods for same 57a-59, 57a-10/03; 42c-1 – 42c-13)
57a-56	Equipment for X-ray cinematography (X-ray tubes 21g-17)
57a-57	Motion picture shows combined with other types of performances (with sound 57a-64 – 57a-72)
	Projection lamps for cinematographs (projection lamps, general 42h-23/04; for colour motion pictures 57a-38)
57a-58/01	with condenser or mirror
57a-58/02	with devices for lighting large slides
57a-59	Equipment attached to tripods and tables for use in association with camera or projector apparatus (tripod and tripod heads, general 42c-1 – 42c-3; 57a-10/03)
57a-60	Portable motion picture equipment with case (portable sound film sets; 57a-64 – 57a-72; portable phonographs 42g-26/02)
57a-61	Special equipment for taking and displaying motion pictures, e. g. slow motion apparatus, uninterrupted showing, miniature motion picture apparatus, special equipment of projection rooms (remote cinematography 21a1-12 – 21a1-35; projection screens 42h-23/27 – 42h-23/29; for sound film 57a-71/01)
57a-62	Cameras with laboratory
57a-63	Automatic cameras
	Pictures combined with sound [sound film]
57a-64	Combined motion picture and phonograph
57a-65	Individual connection and disconnection of instruments, contact devices operated by films or phonograph
57a-66	Means for synchronised drive and for resynchronisation of picture and sound media (21a1-35)
57a-67	Controls for synchronisation, or turning of picture and sound
57a-68	Combination of cinematograph and sound apparatus for combined picture and sound media
57a-69	Means for moving common picture sound media (tape-type sound media 42g-18)
57a-70	Production and transmission of non-recorded sounds to accompany motion picture shows
57a-71/01	Processes and auxiliary devices for the making, reproduction, duplication and aftertreatment of picture and sound recordings, timing devices, post synchronisation, marking, cutting, splicing (sound recording without pictures 42g-7 – 42g-13; marking

	57a-46/02; splicing, cutting of picture films 57c-13), stereoscopic sound motion picture films (stereoscopic cinematography 57a-37), trick sound motion picture films (trick photography 57a-53)
57a-71/02	Structure of picture section (structure of sound section 42g)
57a-72	Picture showing devices, mutoscopes and the like combined with sound reproduction apparatus (mutoscopes, viewing instruments 57a-36)
57b	Photographic processes, blueprints, photosensitive plates and
••••	papers, colour photography, X-ray photography and
	photosculpture
	photosculpture
	Photographic plates, films and papers
57b-1	Transparent supports for photosensitive coatings, except those in 57b-2/01 – 57b-3 (manufacture of films used exclusively as photosensitive coating supports 39b-12/01 – 39b-12/02; production of films from celluloid 39a-16, 39a3-7/00)
57b-2/01	Roll films, protective leaders
57b-2/02	Packing material for photographic plates, films, and papers (cans and magazines 57c-6; 57a-47)
57b-3	Stripping films and papers
57b-4	Anti-halo means for photographic plates and films
57b-5/01	Photographs, especially positives, upon supports other than paper
57b-5/02	Photographs, especially positives, upon special papers
57b-6/01	Application of photosensitive coatings (devices for this purpose 57c-5)
57b-6/02	Removal of coatings and recovering of emulsions or silver
57b-7	Plates for drawing negatives (engraving plates) for photographic purposes and hand-
	painted patterns for copying (manufacture of copying patterns for photomechanical reproduction 57d-1/01)
57b-8/01	Light-sensitive coatings and emulsions containing silver salts for treatment of negatives, also coatings without special supports (colour photography emulsions 57b-18/11)
57b-8/02	Additives for these emulsions, to increase sensitivity, hardening, dullness, preservation, prevention of haze, etc. apart from those in 57b-8/05 – 57b-8/06 (additives to colour photography coatings 57b-18/11 – 57b-18/13)
57b-8/05	Developer plates
57b-8/06	X-ray emulsions (X-ray photography devices 57a-7; 21g-19)
57b-9	Photosensitive coatings containing noble-metal salts for the positive process, also self-toning papers
57b-10	Photosensitive coatings, containing various substances not covered by 57b-8, 57b-9, 57b-11, 57b-12/05 and 57b-15
57b-11	Blueprint papers
	Photographic processes
57b-12/01	Complete processes
57b-12/02	Sensitometry (photometers 42h; devices for sensitometry and for determination of
	density of negatives 57c-4)
57b-12/03	Exposure processes (photographic devices 57a)
57b-12/04	Cinematographic processes (combined with special devices 57a), photographic sound recording (42g)
57b-12/05	Diazotype
57b-12/06	Parallax stereograms
57b-12/07	Fluorescent screens (21f-83/03; 21g-13/25; 21g-19/01; 21g-21)
57b-12/08	X-ray photography (X-ray photography devices 57a-7, 21g-19)
57b-13/01	All-purpose developers (developing devices 57c-7, 57c-8; colour developers and colour developing processes, including aftertreatment of colour pictures 57b-18/13)
57b-13/02	Copying (copying devices 57a-5, 57c-10, 57c-11)

57b-13/03	Combination pictures (devices and processes for cinematographic combinations 57a-53)
57b-13/04	Fixing
57b-13/05	Softening and intensifying
57b-14/01	Chemical modification of photographic pictures by toning, in general
57b-14/02	Photographic contact processes, such as ozotype and catatype, mordant colour pictures
57b-14/03	Picture inversion
57b-15	Photochromatography, e. g. pinatype, bromoil printing (57d-9; woodburytype 57b-20)
57b-16	Photographic vitreous colour pictures
57b-17/01	Marking and identification of photographs
57b-17/02	Retouching (devices for retouching 57c-13)
57b-17/03	Smoothing and roughening (glazing machines 57c-12)
57b-17/04	Mounting and fastening
57b-17/05	Protective and transparent coatings
57b-17/06	Ornamentation, e. g. fine art effect
57b-17/07	Drying (drying devices 57c-9)
57b-17/08	Colouring (colouring devices 57c-13)
	Colour photography
57b-18/01	Photographic bleaching processes
57b-18/02	Multilayer plates and films, multiple packs (cameras for colour photography 57a-8)
57b-18/03	Structure and chemical treatment of coating supports for colour decomposition and formation by interference and dispersion (cameras for this purpose 57a-8/01)
57b-18/04	Structure and chemical treatment of colour screen coating supports for exposure, reproduction and copying (cameras 57a-8/04, 57a-38; copying 57a-8/05)
57b-18/05	Production of colour screens
57b-18/06	Chemical treatment of lenticular screen emulsion carriers for exposure, reproduction and copying (exposure devices 7a-8/04, 57a-38; copying 57a-8/05)
57b-18/07	Colour filters (filter holders 57a, 1004)
57b-18/08	Several superimposed partial colour pictures, subtractive colour photography
57b-18/09	Colouring and chemical treatment of films for colour cinematographic processes (equipment for colour cinematography 57a-38; 42h-23)
57b-18/10	Colouring, and chemical treatment of picture supports for anaglyphs (cameras for anaglyphs 57a-4/01, anaglyphs for motion pictures 57a-37/01)
57b-18/11	Emulsion for colour photography (ordinary emulsion 57b-8/01)
57b-18/12	Colour formers
57b-18/13	Colour developers and colour developing processes, including aftertreatment of colour pictures (ordinary developing processes 57b-13/01)
57b-19	Photographic sculpture (photogrammetric processes and devices 42c-10/04; 57a-4/06)
57b-20	Photographic bas reliefs: lithophany, woodburytype
57b	(IPC: G03C) Photosensitive compositions or bases carrying them; Photographic processes, e.g. cine, x-ray, colour, stereo- photographic processes; Auxiliary processes in photography (electrography, electrophotography, magnetography 57e)
57b-1/00	Photosensitive compositions, e.g. emulsions; Base materials carrying them (photosensitive materials for multicolour processes 57b-7/00; photosensitive glass 32b-3/26)
57b-1/02	with silver salts as the only photosensitive material
57b-1/04 57b-1/06	 containing special layer-forming substances containing additives
57b-1/08	Photosensitivity-increasing substances

57b-1/10	Organic substances
57b-1/12	Methine and polymethine dyes
57b-1/14	with an odd number of CH groups
57b-1/16	with one CH group
57b-1/18	with three CH groups
57b-1/20	with more than three CH groups
57b-1/22	with an even number of CH groups
57b-1/24	Styryl dyes
57b-1/26	Polymethine chain forming part of a heterocyclic ring
57b-1/28	together with supersensitising substances
57b-1/30	hardeners
57b-1/32	matting agents
57b-1/32	fog-inhibitors
57b-1/34 57b-1/36	desensitisers
57b-1/38	agents to facilitate spreading
57b-1/40	dyestuffs not otherwise covered in 57b-1/08 to 57b-1/44 inclusive
57b-1/42	developers
57b-1/44	precious-metal toning salts
57b-1/46	having more than one photosensitive layer
57b-1/48	Photosensitive material carrying developer separately from the photosensitive
	layer
57b-1/50	. with precious-metal salts, other than silver salts, as photosensitive material
57b-1/52	. with diazo compounds as photosensitive material (57b-1/64 takes precedence)
57b-1/54	diazonium salts or diazo anhydrides
57b-1/56	diazo sulphonates
57b-1/58	with special coupling substances
57b-1/60	with additives
57b-1/62	metal compounds reducible to metal
57b-1/64	. with iron compounds, with or without other photosensitive compounds, as
	photosensitive material
57b-1/66	. with chromates
57b-1/66 57b-1/68	•
	. with chromates
57b-1/68	with chromates with photo-polymerisable substances . containing nitrogen
57b-1/68 57b-1/70	 with chromates with photo-polymerisable substances containing nitrogen Other photosensitive compositions
57b-1/68 57b-1/70 57b-1/72	 with chromates with photo-polymerisable substances containing nitrogen Other photosensitive compositions Applying photosensitive layers to base materials (coating processes, devices, or
57b-1/68 57b-1/70 57b-1/72	 with chromates with photo-polymerisable substances containing nitrogen Other photosensitive compositions Applying photosensitive layers to base materials (coating processes, devices, or machines for photomechanical printing surfaces 57d)
57b-1/68 57b-1/70 57b-1/72 57b-1/74	 with chromates with photo-polymerisable substances containing nitrogen Other photosensitive compositions Applying photosensitive layers to base materials (coating processes, devices, or machines for photomechanical printing surfaces 57d) Photosensitive materials characterised by the base

57b-5/12	. Cinematographic processes of taking pictures or printing
57b-5/14	. combined with sound-recording (sound-recording in general 42g)
57b-5/16	. X-ray, infra-red, or ultra-violet ray processes
57b-5/18	. Diazotypy processes
57b-5/20	Reflex-printing
57b-5/22	. Direct chromate processes, i.e. without preceding silver picture
57b-5/24	. Developing processes; Developers (direct chromate processes 5/22)
57b-5/26	for silver layers
57b-5/28	Cinematographic-film processes
57b-5/30	Developers
57b-5/32	Latensification; Desensitisation
57b-5/34	. for diazotypy layers (57b-1/58 takes precedence)
57b-5/36	. Hardening (direct chromate processes 57b-5/22)
57b-5/38	. Fixing; Developing-fixing; Hardening-fixing; Bleach-fixing
57b-5/40	. Chemical transforming of photographic images (57b-5/50 takes precedence)
57b-5/42	Reducing; Intensifying
57b-5/44	. Bleaching
57b-5/46	Toning
57b-5/48	Mordanting
57b-5/50	. Reversal processes
57b-5/52	Silver dye-bleaching processes
57b-5/54	Diffusion transfer processes
57b-5/55	Silver salt diffusion processes
57b-5/56	Other contact processes, e.g. ozotypy, indirect chromate methods
571. 7/00	Multi-slave shate models and specific second the second the
57b-7/00	Multicolour photographic processes; Photosensitive material for
	multicolour processes
57b-7/02	. Bleaching-out processes (reversal processes 57b-5/50)
57b-7/04	. Preparing or chemical treatment of bases with colour screens
57b-7/06	. Manufacture of colour screens
57b-7/08	from diversely-coloured grains irregularly distributed
57b-7/10	with regular areas of colour, e.g. bands, lines, dots
57b-7/12	by photo-exposure
57b-7/14	. Preparing or chemical treatment of bases with lenticular screens
57b-7/16	. Preparing or chemical treatment of bases with superposed colour components for
570-7710	
576 7/40	subtractive colour photography
57b-7/18	Special processes for correction of the colour image in subtractive colour
	photography
57b-7/20	Multilayer plates or films
57b-7/22	. Colouring or chemical treatment of film for colour cinematography
57b-7/24	combined with sound-recording (sound-recording in general 42g)
57b-7/26	. Emulsions for colour photography
57b-7/28	containing compounds which are bleached out by exposure
57b-7/30	. Colour developing; Developers
57b-7/32	. Colour-coupling substances
57b-7/34	with phenols
57b-7/36	with compounds containing active methylene groups
57b-7/38	in the ring of a cyclic compound
57b-7/39	. Bleach-fixing
57b-7/40	. After-treatment of the colour image
575 7740	
57b-9/00	Stereo-photographic or similar processes
57b-9/02	. parallax-stereogram
57b-9/04	vectographic-image
57b-9/06	. anaglyph
57b-9/08	. producing three-dimensional images
57b-11/00	Auxiliary processes in photography (characterised by apparatus used 57c)
57b-11/02	Auxiliary processes in photography (characterised by apparatus used 57c) . Marking or applying of text
	Auxiliary processes in photography (characterised by apparatus used 57c)
57b-11/02	Auxiliary processes in photography (characterised by apparatus used 57c) . Marking or applying of text

57b-11/08	. Varnishing photographs
57b-11/10 57b-11/12	. for protection from ultra-violet light
57b-11/12 57b-11/14	. Stripping or transferring intact photographic layers . Pasting; Mounting
57b-11/16	. Drying
57b-11/18	. Colouring
57b-11/20	with powdered or molten colours
57b-11/22	Preparing plates or films for the manufacture of photographic negatives by non-
57b-11/24	photographic processes . Removing emulsion from waste photographic material
57c	Devices and machines, dark rooms
57c-1	Photographic studio arrangement and equipment
57c-2	Illuminating devices for photographic purposes
57c-3	Flash lamp devices with production of light by means of magnesium, gas, electric current etc., also for non-photographic purposes
57c-4	Devices for determination of density of negatives and of the sensitivity of photographic emulsions
57c-5	Devices for coating photographic plates, films and papers with sensitive emulsions
	(57b-6/01)
57c-6/01	Devices for storing and shipping plates and films (57a-11/01), stands and frames for plates and films
57c-6/02	Numbering devices (writing inside camera 57a-10/08)
57c-6/03	Devices for production of lenticular screens
57c-7/01	Devices for developing photographic plates and the like, developing magazines (57a-11/01), thermometers
57c-7/02	Rocking devices
57c-8/01	Continuous-operation film developing devices
57c-8/02	Hand apparatus for film developing
57c-9/01	Washing apparatus for plates and the like
57c-9/02	Drying devices for plates and the like (57c-12)
57c-10/01	Photographic printing frames
57c-10/02	Fast printing apparatus
57c-10/03	Cylindrical printing apparatus
57c-10/04	Masks
57c-11/01	Flat copying machines for multiple copying
57c-11/02	Rotary copying machines for multiple copying, also with attached developing devices (printing devices 57a-5)
57c-11/03	Copying machines for films
57c-11/04	Control of illumination
57c-12	Devices for production of high gloss on photographic paper (55e-1/01; 57b-17/03)
57c-13/01	Retouching devices
57c-13/02	Devices for colouring photographic emulsion supports
57c-13/03	Devices for cutting photographs (11b-11)
57c-13/04	Devices for cleaning films
57c-13/05	Devices for testing films
57c-13/06	Devices for cutting and splicing films
57c-13/07	Frames, covers (34f-2/01)
57c-14/01	Photographic dark rooms
57c-14/02	Lamps and other devices for photographic dark rooms
57d	Photomechanical reproduction (etching apparatus 48d-1; 48d1-1/00)
	Production of special original and copies
57d-1/01	Making of copies, in general

57d-1/02	Photomechanical type, photocomposing machines (typesetting machines 15a; typewriters 15g)
57d-1/03	Copying patterns for printing sheet music
57d-1/04	Making of original by painting, drawing or etching
57d-1/05	Copying patterns by means of reflex copy (reflex copy 15b-13/02)
57d-1/06	Special carriers of originals for copying patterns
57d-1/07	Reproduction of natural patterns for embossed, cryptographic, security paper, and card printing
	Photomechanical production of printing plates (mechanical production of printing plates 15b-1)
57d-2/01	Image layer as relief, planographic or photogravure printing plate, e. g. collotype
57d-2/02	Making of printing forms by embossing the picture layer
57d-2/03	Making of printing forms by washing unexposed places (printing plates for stencil printing 15b-4; photomechanically manufactured stencils 75c-26)
57d-2/04	Making of printing plates inside the camera
57d-3/01	Making of multicolour printing plates (15b; 13; 57b-18) by subjective colour analysis
57d-3/02	Making of multicolour printing forms by photomechanical colour analysis
57d-3/03	Mounting of partial plates
57d-4	Making of printing plates for special design effects, e. g. for printing geographical maps (15b-4; 57d-1/07)
57d-5/01	Making of printing plates upon non-planar plates, especially on cylinders (15b-5; 15c-5)
57d-5/02	Justifications, especially for making carbon transfers
57d-6	Production of printing grain for printing plates in general, e. g. for autotype, photolithographic halftone printing (57d-7; 15b-6)
57d-7	Production of printing grain by diaphragm or screen effect modifications, combination of several screens, retouching screen elements, enlargements
57d-8/01	Diaphragms for photomechanical reproduction
57d-8/02	Screens for photomechanical reproduction
57d-9	Photomechanical printing processes, such as absorption printing by means of colloid emulsion, catatype and the like (15k; 57b-14)
57d-10	Making of printing plates by photoelectric transmission of pictures and the like (telephotographic transmission of pictures 21a1-31, 21a1-32, 21a2-32; electrical printing 15k-7)
57e	(IPC: G03G) Electrography; Electrophotography; Magnetography
	(electrostatic and thermographic copying and printing methods 15k-7/05; recording by means of cathode ray tubes, e.g. of television signals by means of thermoplastic deformation 21a1-32; recording of information 42t2)
	Note: This subclass deals with the production of permanent directly-visible pictures in conformity with an original picture or document, using an imagewise distribution of an electric or magnetic quantity, such as a charge pattern, an electric conductivity pattern, or a magnetic pattern
57e-5/00	Recording-members for original recording by exposure e.g. to light, to heat, to electrons; Manufacture thereof; Selection of materials therefor (recording surfaces for measuring apparatus 55f-16; photosensitive compositions 57b)
57e-5/02 57e-5/04	 Charge-receiving layers Photoconductive layers; Bonding thereof
57e-5/06 57e-5/08	 the photoconductive material being organic the photoconductive material being inorganic and incorporated in an organic bonding material

57e-19/00	Processes using magnetic patterns; Apparatus therefor
57e-17/00 57e-17/02	Electrographic processes using patterns other than charge patterns; Apparatus essentially involving a single such process . with electrolytic development
57e-15/02 57e-15/04 57e-15/08 57e-15/08 57e-15/10 57e-15/12 57e-15/14 57e-15/16 57e-15/18 57e-15/20 57e-15/22	 Note: This group also deals with processes in so far as they are characterised by the use or manipulation of apparatus classifiable per se in this group. for sensitising, i.e. laying-down a uniform charge for exposing, i.e. transmitting the information given by the original image to the recording material for developing using a solid developer, e.g. powder developer using a liquid developer for transferring a pattern to a second base of a toner pattern, e.g. a powder pattern of a charge pattern for fixing involving the combination of more than one step according to groups 57e-13/02 to 57e-13/20
57e-15/00	Apparatus for electrographic processes using a charge pattern
57e-11/00 57e-13/00 57e-13/04 57e-13/04 57e-13/08 57e-13/10 57e-13/10 57e-13/12 57e-13/14 57e-13/16 57e-13/18 57e-13/20 57e-13/21 57e-13/22	 Selection of substances for use as fixing agents Electrographic processes using a charge pattern Sensitising, i.e. laying-down a uniform charge Exposing, i.e. transmitting the information given by the original image to the recording material Developing using a solid developer, e.g. powder developer using a liquid developer Warming Transferring a pattern to a second base of a toner pattern, e.g. a powder pattern of a charge pattern Fixing by heating Processes involving the combination of more than one step according to groups 57e-13/02 to 57e-13/20
57e-9/00 57e-9/02 57e-9/04 57e-9/06	 Selection of substances for use as developers the developer being solid the developer being liquid, e.g. aerosol the developer being electrolytic
57e-5/10 57e-7/00	. Carriers for charge-receiving or other layers Selection of materials for use in image-receiving members, i.e. for reversal by physical contact; Manufacture thereof (photosensitive compositions 57b)
